

Maximus IT - 2005

The Requirements

Maximus is an independent IT Resourcing Company based in the City and at Heathrow's Stockley Park. They focus on providing highly specialist contractors to the Oracle and SAP markets. The company wanted to give these professionals greater self-service as routine timesheet enquiries were taking up valuable management time that could be better spent winning new business. They needed a system that would integrate in real time with the existing finance package (Sage Accounts™) and front-end (RDB Pro 9.5).

The Solution

We worked closely with Maximus to create a timesheet system that would deliver cost savings and meet the expectations of top-level IT consultants and contractors. Details of Maximus' placements and rates were imported from RDB via FTP and a CSV exporter gave connectivity with Sage.

- 
- ▶ 75% reduction in processing and administration time
 - ▶ Payroll now completes "at the touch of a button"
 - ▶ Contractors can now answer their own questions about payroll
 - ▶ Invoices are no longer lost in the postal system

"It used to take all morning to complete our pay run, but now everything is ready in half an hour."

- *Satnam Brar*, Managing Director
